Instructions: Section 382.703(a) of the Title 49 CFR, states "No employer may query the Clearinghouse to determine whether a record exists for any particular driver without first obtaining that driver's written or electronic consent." The type of consent required depends on the type of query. For a limited query, a general consent is required. This will be obtained outside the Clearinghouse. Employers may obtain a multi-year general consent from the driver for limited queries. For a full query, the driver must provide specific consent to the employer prior to each full query. This consent must be provided electronically within the Clearinghouse.
